About the job

We are a private hedge fund and family office operating across global markets, trading 24 hours a day. It is committed to the development and deployment of successful quantitative strategies, developed in-house through a disciplined and rigorous research process.

We are currently growing our IT team and are looking for an individual to fill to a new permanent programmer position.

The focus of the role will be on the design, building and deployment of inhouse executable programs that focus on:

- Machine Learning
- Data Mining
- Computational Statistics
- Behavioural Analysis

Accordingly, programming experience within applications that involve real time data streams and real time processes will be highly regarded.

Although prior knowledge of or experience in finance is not a pre-requisite, a strong interest in global markets and trading is essential.

All levels of experience will be considered.

The technology skills required to perform the role are:

- .NET Framework, WinForms, .NET 6.0, ASP.NET 6.0 (Web API).
- F#, C# and C++ are the primary languages used. In perspective, willingness to work with (and learn if necessary) F# and C# are a must.
- Docker and Kubernetes.
- Microsoft Azure.
- Microservices with Dapr.
- InfluxDB.
- Visual Studio 2022, Visual Studio Code as IDEs.

If this sounds like you:

Apply! Or drop me a line at abaniqued@infopeople.com.au OR give me a call on 02 8227 4522 to discuss further. If we believe you're a good match, we'll get in touch with you to let you know the next steps!

Infopeople - Abigail Baniqued

Employer questions

Your application will include the following questions:

Which of the following statements best describes your right to work in Australia?

Which of the following statements best describes your Covid-19 vaccination status?

How many years' experience do you have as a Programmer?
